

DermaSaver Shin Tubes

DermaSaver Testimonial from Mr Eric Matthews, Worthing, United Kingdom

I suffer from Heart Failure. One of the manifestations that are a result of this condition is that I suffer from large areas of Blisters on my legs from below the knees to the ankles. These blisters break open leaving areas of raw skin that become infected and turn to Ulcers. The condition has been going on for several months now, and is caused by the fact that my heart is not strong enough to pump away the fluid which is retained in the legs.

The condition is very painful and despite every strategy recommended by the Heart Specialist and Skin Specialist I continue to have the problem. Despite being on the maximum dose of Pain Relieving Drugs I fail to get a night's sleep because of the severe pain and discomfort, when I put my legs up – which I am supposed to do!

The District Nurse calls every day to dress my legs, but the dressings used fail to absorb all the moisture that comes away from my legs. I usually end up with soaking wet dressings that have worked their way down to my ankles. My ankles are red and very sore!

Earlier in the year I was fortunate enough to be introduced to DermaSaver leg tubes through Win Health. These are made of a special soft breathable material. By removing the Dressings put on by the District Nurse and using the Leggings gives me the only measure of relief that I can find. Because the material is breathable and does not require other Dressings on the leg, they allow the air to circulate over the blisters, which helps to dry and heal the sores.

The tubes are soft, cool and comfortable to wear on my sore legs. They are very easy to put on which is so essential when you can't bend etc. They really take away the fluid that oozes from my legs. As they are washable, I just wash them as soon as they get too wet. They are machine washable and I also tumble dry them. There is no wastage compared with dressings that have to be renewed.

I cannot recommend them too highly and a big "THANK YOU" to Win Health for introducing them to me. I don't know how I would manage without them!

Eric Matthews, June 2006, Worthing, England
