

Dear Win Health,

I promised when I purchased the Palmlaser that I would write a review of your product. So below is my review.

I have been using the Palmlaser for one year three to four times a week and within one month noticed a tightening of the skin under my eyes. I no longer wake up with puffy eyes. I have also had a reduction of minor wrinkles, and a general tightening of your skin's collagen. My frown lines are minimized giving me a smoother more youthful appearance. I can't imagine living without my Palmlaser.

Also, the people at Win Health are extremely knowledgeable and supportive. I was lucky to find them and their products.

Best Regards,
